

nursemate® PLUS 150 Colostrum Replacer with *Immu-PRIME*

- **nursemate® PLUS 150 Replacer with *Immu-PRIME*** is derived from actual bovine colostrum collected from high quality dairy cows in the USA.
- Sterling Technology guarantees a level of **150gm of globulin protein per dose** to eliminate the worry about quality of colostrum.
- **nursemate® PLUS 150 Replacer has *Immu-PRIME*** which has been proven to significantly decrease failure of passive transfer.
- **nursemate® PLUS 150 Replacer with *Immu-PRIME*** helps reduce the need for on farm pasteurization which often denatures the antibody leaving the calf with ineffective colostrum.
- Guaranteed BVD/BLV & Johne's Free
- Gentle processing to ensure bioactives retain their biological effect
- New, easy to mix formula.

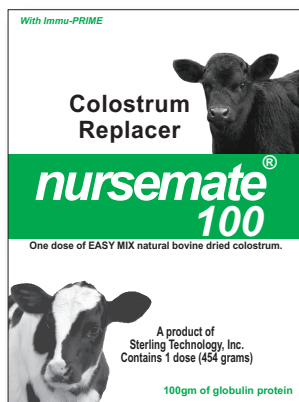

nursemate® 50 with *Immu-PRIME*®

- **nursemate® 50 with *Immu-PRIME*** is a high performance colostrum supplement that begins protecting the newborn naturally. This potent blend of proteins, fats and vitamins has strong immunomodulatory effects and is high in antioxidant activity.
- **nursemate® 50** also contains a relatively high level of lactoferrin, a protein that limits the growth of Gramnegative bacteria like salmonella, E. coli and other micro-organisms that require iron for their survival.
- Made in the USA, from natural bovine colostrum
- Guaranteed BVD/BLV & Johne's Free
- Gentle processing to ensure bioactives retain their biological effect
- New, easy to mix formula.

nursemate® 100 with *Immu-PRIME*

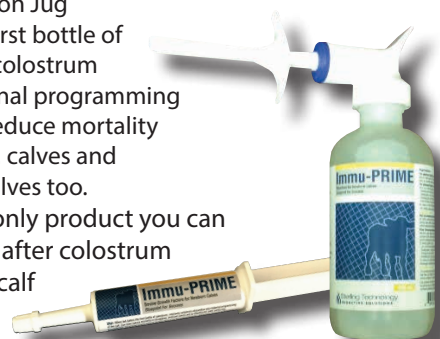

- **nursemate® 100 with *Immu-PRIME*** is a high quality colostrum replacer in an easy mix powder which delivers critical nutrients to your calves.
- **nursemate® 100 with *Immu-PRIME*** is a single dose replacement which provides calves a healthy alternative when maternal colostrum is low quality or unavailable.
- **The *Immu-PRIME* in nursemate® 100 colostrum replacer** improves colostrum absorption and maternal programming of the calf while at the same time activating the cells of the newborn for protection from disease.
- Made in the USA, from natural bovine colostrum
- Guaranteed BVD/BLV & Johne's Free
- Gentle processing to ensure bioactives retain their biological effect
- New, easy to mix formula.

Immu-PRIME®

Bioactives for Newborn Calves

- Recent research demonstrated that *Immu-PRIME*, when given for four consecutive days, significantly increased plasma protein which can help increase IgG uptake and better establish passive immunity.
- Available in single dose 10ml tube, 250ml 25 dose bottle with Swift Doser and 1-gallon Jug
- When fed before the first bottle of colostrum, improves colostrum absorption and maternal programming of the calf. Can help reduce mortality in struggling, stressed calves and is effective for older calves too.
- *Immu-PRIME*® is the only product you can use before, during or after colostrum feeding to help your calf survive and thrive.
